LANGUAGES

Uzbek — Native
Russian — Fluent
English — Fluent

SKILLS

- Python
- LangGraph
- FastAPI
- Next.js
- RAG Pipelines
- QLoRA Fine-tuning
- Docker
- Git / GitHub
- Gradio

EDUCATION

University of World Languages

English Philology & Language Teaching, 2nd year — since 2025

BePro Academy

UN AI/ML Mentorship Program — since April 2025

Shahrizoda Hamidova

AI/ML Engineer in Training

PROFILE

AI/ML student building end-to-end RAG and multi-agent applications as part of an intensive AI/ML mentorship program. Background in English philology and language teaching brings strong cross-lingual communication and documentation skills. Comfortable across the full stack: data processing, model fine-tuning, backend APIs, and deployment.

PROJECTS

Loan Terms Assistant

RAG-based Loan / Credit Terms & Conditions Assistant

Built a retrieval-augmented assistant over the NBU Uzbek Consumer Loan document; fine-tuned Qwen2.5-1.5B-Instruct with QLoRA and shipped an interactive Gradio demo, deployed on Render.

Multi-Agent AI Analyst

Supervisor–Retriever–Critic Multi-Agent System

Designed a multi-agent system with LangGraph to analyze a company dataset, with a FastAPI backend and Next.js frontend, deployed on Render and Vercel.

Agentic RAG App

Full-Stack Agentic Retrieval-Augmented Generation App

Combined LangGraph, FastAPI, and Next.js with DeepSeek LLM and HuggingFace embeddings; deployed via a multi-stage Docker build on Render.

STRENGTHS

- Full-stack AI product development, from data pipeline to deployment
- Cross-lingual documentation and communication (Uzbek, Russian, English)
- Fast learner — active in an intensive, hands-on AI/ML mentorship program
